SUMMARY

Developer with 5 years of experience, seeking new projects and opportunities, open to relocation

EXPERIENCE

Software Developer
Freelance   **March 2024 – Present, Belgrade**
· Designed and implemented small-scale projects for various clients, including Telegram bots, data parsers and backend services.
· Built and deployed applications using Python, Django REST Framework (DRF), FastAPI, Redis,python-telegram-bot, Selenium and related tools.
· Delivered end-to-end solutions: from gathering requirements and writing code to testing, deployment, and client support.
· Developed automation scripts to streamline workflows and improve efficiency for clients.

Software Developer
DNK IT Solutions LLC   **November 2022 – March 2024, Bishkek**
· Built and maintained services with Django REST Framework.
· Participated in system architecture design and integration of external APIs.
· Improved database queries and optimized system performance.

Software Engineer
EPAM Systems   **June 2022 – November 2022, Bishkek**
· Gained experience in collaborative development within large international teams.
· Configured microservices using docker and docker-compose.
· Designed and shipped high-load services on DRF/FastAPI with async endpoints, DB transactions, and caching (Redis), achieving low-latency responses under peak traffic.
· Backend developer in a Scrum team for an online education platform.
· Integrated RESTful APIs into backend microservices, streamlining data exchange between services and enhancing overall system responsiveness within a distributed environment.

Software Developer
Yandex Practicum   **September 2021 – June 2022, St. Petersburg**
· Designed microservices, implemented REST APIs, and integrated with Redis and aiohttp.
· Wrote automated tests to ensure system.
· Designed and optimized database models in PostgreSQL to support new features.

Project Lead Developer / Backend Developer
PiterAvto   **June 2019 – September 2021, St. Petersburg**
· Designed and implemented microservice architecture for processing financial.
· Developed asynchronous REST APIs with aiohttp and Django.
· Optimized PostgreSQL queries, implemented Celery-based task distribution.
· Consolidated legacy monolithic components by introducing automated deployment pipelines using Docker and GitLab CI, accelerating release cycles by 30% and enabling smooth rollouts to a team of 15 engineers over a 12-month period.

SKILLS

Python, Django, FastAPI, aiohttp, python-telegram-bot

REST Framework (DRF), Redis

Selenium, RAG, LLM/AI, langchain

PostgreSQL, MySQL

Docker, docker-compose

English (B2), Russian
